Focus

The logo for Routledge Focus, featuring a stylized white profile of a person's head facing right, with the word 'ROUTLEDGE' written vertically to its left and 'Focus' written horizontally below it.

Knowledge Management

This shortform book presents key peer-reviewed research selected by expert series editors and contextualised by new analysis from each author on the subject of knowledge management in industrial history.

With contributions on knowledge management, knowledge transfer, knowledge loss, knowledge creation, competition and co-operation in producing skilled employees, and ownership structures and their relation to knowledge management, this volume provides an array of fascinating insights into industrial history.

Of interest to business and economic historians, this shortform book also provides analysis and illustrative case-studies that will be valuable reading across the social sciences.

John F. Wilson is Pro Vice-Chancellor (Business and Law) at Northumbria University at Newcastle. He has published widely in the fields of business, management and industrial history, including ten monographs, six edited collections and over seventy articles and chapters.

Ian Jones is Senior Research Assistant at Newcastle Business School, Northumbria University, and has previously won the John F. Mee Best Paper Award at the Academy of Management in 2018 for his contribution to the Management History Division.

Steven Toms is Professor of Accounting at the University of Leeds. He is former Editor of *Business History*. His research interests are focused on accounting and financial history and the history of the textile industry.

Routledge Focus on Industrial History

Series Editors: John F. Wilson, Steven Toms and Ian Jones

This shortform series presents key peer-reviewed research originally published in the *Journal of Industrial History*, selected by expert series editors and contextualised by new analysis from each author on how the specific field addressed has evolved.

Of interest to business historians, economic historians and social scientists interested in the development of key industries, the series makes theoretical and conceptual contributions to the field, as well as providing a plethora of empirical, illustrative and detailed case-studies of industrial developments in Britain, the United States and other international settings.

The Role of Governments in Markets

Interventions and Unexpected Consequences in Industrial History
