This book contains information obtained from authentic and highly regarded sources. While all reasonable efforts have been made to publish reliable data and information, neither the author[s] nor the publisher can accept any legal responsibility or liability for any errors or omissions that may be made. The publishers wish to make clear that any views or opinions expressed in this book by individual editors, authors or contributors are personal to them and do not necessarily reflect the views/opinions of the publishers. The information or guidance contained in this book is intended for use by medical, scientific or health-care professionals and is provided strictly as a supplement to the medical or other professional's own judgement, their knowledge of the patient's medical history, relevant manufacturer's instructions and the appropriate best practice guidelines. Because of the rapid advances in medical science, any information or advice on dosages, procedures or diagnoses should be independently verified. The reader is strongly urged to consult the relevant national drug formulary and the drug companies' and device or material manufacturers' printed instructions, and their websites, before administering or utilizing any of the drugs, devices or materials mentioned in this book. This book does not indicate whether a particular treatment is appropriate or suitable for a particular individual. Ultimately it is the sole responsibility of the medical professional to make his or her own professional judgements, so as to advise and treat patients appropriately. The authors and publishers have also attempted to trace the copyright holders of all material reproduced in this publication and apologize to copyright holders if permission to publish in this form has not been obtained. If any copyright material has not been acknowledged please write and let us know so we may rectify in any future reprint.

Except as permitted under U.S. Copyright Law, no part of this book may be reprinted, reproduced, transmitted, or utilized in any form by any electronic, mechanical, or other means, now known or hereafter invented, including photocopying, microfilming, and recording, or in any information storage or retrieval system, without written permission from the publishers.

For permission to photocopy or use material electronically from this work, please access www.copyright.com (<http://www.copyright.com/>) or contact the Copyright Clearance Center, Inc. (CCC), 222 Rosewood Drive, Danvers, MA 01923, 978-750-8400. CCC is a not-for-profit organization that provides licenses and registration for a variety of users. For organizations that have been granted a photocopy license by the CCC, a separate system of payment has been arranged.

Acknowledgments

Thanks to all those without whom this book would never have been possible. It began with a meeting, followed by conversation, experience, memory, and understanding. Then, and only then, came this book.

I would especially like to thank:

All the patients, relatives, friends, and colleagues who placed their trust in me; Dr. Elke Leonhard, Dr. Tobias Winstel, and Karin Stuhldreier for their tremendous support; and the whole team at Kösel Verlag—thanks to readers Hans Georg Hoffmann, Marlene Fritsch, and Noah Block-Harley. A special thanks to my colleague and partner in our Breaking Bad News seminars, Dr. Christine Klapp, and my mentor, Wolfgang Kohlhaase, and a thousand thanks to my terrific kids and my wonderful wife, Mrs. Adak Pirmorady.

Author

Professor Dr. med. h.c. Jalid Sehoul is a German gynecologist and oncologist who specializes in peritoneal and ovarian cancer. He is a professor at the famous Berlin's Charité Hospital and a writer of scientific as well as philosophic works.

Dr. Sehoul is the son of Moroccan parents who fled from Morocco in the 1960s and were illiterate. He grew up in the Berlin working-class district of Wedding. While training to become a nurse, he was offered a place to study medicine at the Free University of Berlin. He studied there from 1989 to 1995. In 1998, he earned his doctorate with a thesis on "Post-Operative Use of Unconventional Cancer Therapies in Gynecological Oncology." He was certified in 2002 as a specialist in gynecology and obstetrics.

In 2005, he was appointed to teach gynecology and obstetrics. Two years later, in 2007, he accepted the offer of a W2 professorship at Berlin's Charité Hospital. In 2014, he was selected for the W3 full professorship for Gynecology for life at the Charité and has since been director of the Clinic for Gynaecology and a full professor at the Charité and leads one of the largest and most famous gynecological cancer centers there.

Dr. Sehoul also specializes in experimental surgical gynecology and oncosurgery, as well as the subject of doctor–patient communication (e.g., breaking bad news). Dr. Sehoul is the coeditor of various professional journals and the author (first, senior, or coauthor) of several hundred articles in national and international journals on all aspects of gynecology with an emphasis on diagnosis, therapy, and aftercare in gynecological oncology. He has performed several international surveys about patients' preferences and patients' expectations.

In 2012, Dr. Sehoul published his first work of fiction and philosophy, *Marrakech*. His second nonbeltristic book is about the city Tangier. His books are translated into several languages.

In 2018, he published the book about breaking bad news in German, here you find the English version.
