Preface

In the five years since the typescript of the first edition of this *Dictionary* was delivered to the publishers, some additional 3,000 pseudonyms and nearly 5,000 real names have been added, increasing the original edition by some 30 to 35 per cent. In addition, readers and reviewers have been kind enough to point out errors and omissions, which have to the best of my ability been corrected.

As explained in the Preface to the first edition, this work arose from the simple need to discover the true identity of the writer Daniel Chaucer and the apparent absence of any book that would provide the answer. Successive enquiries and note-taking, when looking for other names, produced a dossier of unmanageable proportions and the seeds of the first edition were thus planted. This volume pretends to no other purpose than to satisfy the curious and to be used as a tool by those fortunate enough to have an interest in books and the book trade.

Given the extent to which most new authors struggle to find a sympathetic publisher, it seems strange that any should disguise their identity. Centuries ago, when an incautious writer might have been rash enough to touch upon some religious or political point of controversy, it probably would have been a prudent precaution and, later on, convention might have dictated that anonymity attach to a learned dissertation on a point of law or religion. Whatever the reasons, many books and pamphlets were published with an impersonal attribution, and we find works by 'A Member of the Church of Scotland', 'A Layman', 'A Barrister-at-Law', 'A Learned Divine' or variants on these themes, all seeming to imply reluctant, yet driven and competent, authorship. Was it delicacy, modesty or etiquette that led to many women writers assuming the mantle of 'A Lady' or 'A Lady of . . .', rather than reveal their real names on their works? Or was it because until comparatively recently there was some insecurity attaching to their income and property rights? Mary Augusta Ward, using her husband's first name, published as Mrs Humphry Ward, achieving astonishing levels of popularity. Many novels by her, and others, appeared originally in serial form in the magazines and journals that blossomed in the nineteenth century.

The subterfuge of pseudonymity continues to be practised, and in the present century the genres of romance, crime and science fiction have generated so much pseudonymous writing that one can only conclude that the convention is merely playful whimsicality. Here and there a few authors, under their real names, may have carefully nurtured a reputation in some more academic field which they seek to protect from critical obloquy, but, given the respectability attaching to much popular fiction, the camouflage seems to be unnecessary.

The compiler, whose real name appears below, accepts all responsibility for any errors or omissions and, being aware that no work such as this is ever complete, requests the readers' indulgence, if only to avoid future pseudonymity. It is appropriate here to express gratitude to those friends and colleagues who have given support and encouragement in the preparation of this work.

T. J. Carty

Arrangement of the Material

In the manner of an Ordnance Survey map, a reference work should be easy to follow and in setting out the information a straightforward alphabetical approach has been adopted. The *Dictionary* is in two parts. Part I lists pseudonyms in alphabetical order, against which are set the real names of the writers. Part II lists real names, providing brief details about the author and his or her use of the pseudonym, together with some titles of books or journals where the false name was used. However, no entries should be assumed to be complete bibliographies, as that task lies outside the scope of the present work. Where possible, the best-known title or titles are given.

An asterisk (*) against a pseudonym in Part II indicates joint, or in some cases triple, authorship, and the user should consult Part I.

In the alphabetical filing, the use of the definite and indefinite article has been ignored, as have the prefixes Miss, Mr and Mrs. Familial titles such as Uncle or Aunt appear under U or A as appropriate, as do more formal titles such as Doctor, General, Countess, etc., which appear under D, G and C. Names with prefixes, such as De Vere and Le Fevre, are treated as one word; Mc and M' are collected under Mac, and St under Saint. Different pseudonyms used by one person writing for journals are grouped by journal title.
