INTRODUCTION

... words. They are not in my dictionary.
(15.3279)

WHAT THIS BOOK IS, AND IS NOT

This book provides a handlist to James Joyce's *Ulysses*, or a complete alphabetical index to the critical reading text, that is, the text on the right-hand pages in the critical edition of 1984 and all its future reprintings.¹ The list is an unedited compilation to meet immediate needs of orientation for the new original text of *Ulysses*. Established directly from the output files generated in the computer-controlled typesetting of the critical edition, it leaves every differentiating or controlling feature of the printing intact, save for suppressing marks of punctuation, dialogue dashes, and positioning codes for paragraph indentations or insets. Specifically, it distinguishes upper and lower case, preserves accents and super- or subscripts, and gives separate entries to capitalized and noncapitalized forms as well as to distinct occurrences of the same forms in the edition's respective typefaces of roman, sloped roman, italics, full caps, and small caps. In reproducing without editorial interference what the superior text-sorting routines of the Tübingen text-processing system TUSTEP are capable of providing, it may be deemed a thoroughly unintelligent compilation. This is for the present unashamedly acknowledged, and no pretense to achievement is made for what is a mere automatized derivation from the text of *Ulysses* in computer storage.

No forms are excluded from the complete index. Although the listings of those with the highest frequency fill several columns each, they do not proportionally swell the compilation unduly. This is partly due to the circumstance that the critical edition's reference system serves to economize on space. It is also a function of the high total of entries resulting from the richness and variety of the language in *Ulysses*. Besides, the division by upper- and lower-case initials and the distinction of forms according to typeface breaks up somewhat the highest-frequency entries as, more usefully at times, it breaks up those of lower frequency. Possible uses of the typographic distinctions preserved may be found to lie in the easier recognition of certain forms or usages in specific contexts or sections of the text indexed. Owing to the manner of division adopted, only the absolute frequency of each listed form is given and no relative frequencies are indicated. The references are by episodes and line numbers within episodes, according to the reference system devised for the reading text of the critical edition and every subsequent edition that, regardless of its individual pagination, opts for the lineation of the critical edition's right-hand pages. The multiple occurrence of a form within a line is covered by a single line-reference.

Strictly, and in accordance with our epigraph, the index entries in the *Handlist* are graphic units or language tokens,

¹ James Joyce, *Ulysses. A Critical and Synoptic Edition*, prepared by Hans Walter Gabler with Wolfhard Steppe and Claus Melchior, vols. 1-3, New York & London: Garland Publishing, Inc., 1984.

not words. From 25.545 lines of text our programs extracted 264.485 graphic units that were arranged under 39.806 entries. In their vast majority, it is true, these entries take the form of words that may directly, or indirectly by lemmatized reduction, be matched against standard dictionary listings. But lemmatization, i.e. reduction to standard base forms, or dictionary matchings are operations that from the materials provided in this *Handlist* must as yet be left to its users. For if the index is not properly a word list, it is even less a concordance, let alone a dictionary of the language of *Ulysses*. Working our listings into a concordance properly speaking – leaving aside its savage cousin the KWIC (Key Word in Context) Index bred and promoted by computer specialists – or into a *Ulysses* dictionary worthy the name would require the comprehensive and long-term application of a philologist's skills, intelligence, and sense of purpose. Unprovided with either a concordance or a dictionary, however, the user of this *Handlist* may gain both excitement and insight from exploring on his own the paths of the philologist that often enough lead to discoveries of some moment in the language universe of *Ulysses*.

GLIMPSES OF CONCORDING

1. Two objections are commonly raised against 'word' lists sorted by the computer in a purely mechanical way: they lump together different words if they are spelled alike (homographs), and they do not assemble occurrences of the same word so as to form one entry if they are spelled differently. If 'ditto', under Joyce's hands, comes out as 'do' (16.1700) and 'number' as 'no' (16.1301, 16.1249, 17.1791, 17.1869, 18.573), they will inevitably add to, and get lost within, the large entries provided mainly for other kinds of 'do' and 'no', and they will leave incomplete the entries for 'ditto' and 'number', invalidating at the same time the frequency counts for all entries concerned. A dictionary would put them in their right places and insert cross-references at the alphabetical positions defined by their actual spellings. The roman numeral 'I' (1.0) that signifies the first part of *Ulysses* is drowned among several thousand personal pronouns spelled in the same way: 'I'. These are, to be sure, separated from the pronoun 'i' adopted by H. Rumbold, Master Barber (12.419-428), which appears in a batch with Irish 'i' and Italian 'i' (12.265, 16.314). A dictionary would not only have to rearrange matters – breaking up entries, and joining others – it would moreover have to define meanings and to subdivide entries in order to specify special meanings and connotations. The 'gods' that come to Bloom's mind (8.924) are after all not quite the same as the 'gods and little fishes' appealed to by his daughter (6.88), and still less are they to be confused with those in the theatre (11.624): 'In the gods of the old Royal with little Peake.' The 'gods' appearing in the lines taken from *Cymbeline* (9.1223), on the other hand, should be marked as part of a quotation, as belonging to a passage that is artistic language of an earlier date turned to an artistic use in a modern context. All these 'gods' are not a plural of the one 'God' so often invoked by the Dubliners in *Ulysses*. He undergoes transformations that a dictionary would have to unite with his normal name: 'Goooooooooooood' is an instance (15.4716); 'Dooooooooooooog' (15.4711) is another. A dictionary would separate 'ram' = 'male sheep' from 'to ram' = 'to push' and distinguish further between literal (15.30) and

figurative, and moreover idiomatic, uses of the verb: 'he wanted to ram it down my neck' (18.173). It would also have to account for the fact that the 'rams' marching with the lambs (12.103) have more affinity with the 'bellwethers' (12.102) marching at the opposite end of the alphabet than with the 'ram' that holds his station in the zodiac (12.360). A dictionary would go on to composite expressions and make sure, largely by means of cross-references, that rams' horns can be associated and contrasted with 'inkhorns' (12.1715). It would point out that the 'ram's horn' used as an example of crookedness (13.952) is something different from the shophar of Jewish rite – 'The rams' horns sound for silence' (15.1619) – and different as well from the 'ramshorns' prominent on the forehead of sir Frederick Falkiner (15.1165), an excellent occasion, by the way, to comment on the theoretical borderland between genitive group and compound. It would finally put Cissy Caffrey's 'jasberry ram' (13.272) on its proper shelf in the larder of *Ulysses*, next to Molly Bloom's 'black currant jam' (18.940).

2. When dealing with hyphenated compounds or compounds spelled in one word ('publichouse', 'musichall'), compilers of word indexes have usually thought it desirable to have special entries or cross-references accounting for the second elements.² They seem to consider the compound as something to be cut up. Quite to the contrary, a dictionary would take care to bring together the elements that make up a compound that is not spelled as one graphic unit: 'black currant jam', 'burned cork moustache' (13.276f.),³ 'bread and butter' (8.40), 'half and half' (12.1052–55), 'beef to the heels' (4.403, 8.617f.). 'Fair day and all the beef to the heels were in', writes Milly Bloom (4.402f.), and some readers seem to have taken this to imply that the Irish peasants, unmindful of their crops, just wait for fair weather to drive to the nearest town in order to have themselves photographed: 'Quel beau temps', reads the French translation; 'Ganz phantastischer Tag', a more recent German one, while the Italian version makes it 'una bella giornata'. They have overlooked that there is another compound involved, and thus they have picked the wrong meaning for its first element – the wrong entry in the dictionary, so to speak – for 'Fair'; it is of course the *fair-day* (*OED s.v.* Fair *sb.*⁴ 2.) that attracts the farmers.

3. That a dictionary has to provide explanations or definitions for rare words and expressions will seem quite natural to the reader who looks them up because he does not know them. He will be glad to find 'beef to the heels' and 'cessile air' (14.1409) explained, and quoted from *Ulysses*, in the *Supplement* to the *OED*.⁴ A dictionary dealing with *Ulysses*,

² Miles L. Hanley, *Word Index to James Joyce's Ulysses* (Madison, 1937), p. xii, proposes cross-references. Leslie Hancock, *Word Index to James Joyce's Portrait of the Artist* (Carbondale & Edwardsville, 1967), pp. 141–145, has a section listing second elements only. Wilhelm Füger, *Concordance to James Joyce's Dubliners* (Hildesheim & New York, 1980), pp. 843–856, supplies a Reverse Index, which groups compounds containing the same second elements together.

³ *The Oxford English Dictionary* (Reissue of *A New English Dictionary on Historical Principles*, 1882–1928; Oxford, 1933) lists all kinds of moustaches in men and women, and in cats, seals, fish, birds, and monkeys. Curiously enough no instance is cited of a 'figurative' moustache painted on an otherwise beardless face. One may wonder whether 'burned cork' should signify a pigment (cf. 'burnt sienna', 'burnt umber') or whether Cissy Caffrey simply held a cork stopper into the flame until it was scorched and fit to be used as a crayon.

⁴ *A Supplement to the Oxford English Dictionary*, ed. R. W. Burch-

however, will also have to cope with words for which it might fail to find a satisfactory explanation or any other evidence at all; 'kinnatt' (13.601) might be such a word. While the *Supplement* can afford to ignore it altogether, a dictionary to *Ulysses* would have to state its failure, thereby still giving an important piece of information, and a challenge, to the student of English. But it is not only the rare and obscure words that deserve attention. The student will also like to learn how everyday words are used, and whether they are used in a particular sense. A 'finger' can be a measure, something like the breadth of a finger (*OED s.v.* Finger *sb.* 5.a.), and the reader has a right to be told that this particular use of 'finger' is present in *Ulysses* (13.160). Bloom slams the carriage door 'twice' (6.10), but the sailor, demonstrating the marksmanship of Simon Dedalus' namesake, does not shout twice when the text seems to say so; having just shouted 'once' (16.398), he now shouts only once more, for the second time: 'Pom! he shouted twice.' (16.401; cf. *OED s.v.* Twice 1.c. See also 17.834). 'Stately', the first word in the book, is commonly known to be an adjective. Anthony Burgess remarks on it: "Sometimes . . . one wonders if Joyce meant it adverbially."⁵ The *OED* (*s.v.* Stately B.) does indeed record the form 'stately' in adverbial senses, though it has no quotations from modern texts. Joyce definitely wanted to have an adverb when he made William Brayden pass 'stately up the staircase' (7.45). The adverb here was at once misprinted, and the corrupt form 'stately', in the position of an adverb, was swallowed by English-speaking readers ever since. This might be interpreted as evidence that English usage would after all admit of an adverb 'stately', and the question raised by Burgess would be open again.

4. Usually the maker of a word list or concordance has to deal with a certain amount of *types*, i.e. different words as defined by their meanings, while his text contains a much larger number of *tokens*, i.e. individual occurrences of these different words. In *Ulysses*, however, and this might go for many other texts written or spoken, there are *tokens* that belong to more than one *type*. 'Humour wet and dry', is Stephen's mental comment on his having stood drinks to some pressmen; bottles and jokes have been cracked. A dictionary of the English language, intending to document the different meanings of 'humour', would simply reject such a quotation as it cannot be filed under any one particular meaning. The meaning of the phrase depends on the condition that two different meanings of the word, or rather two different words, are understood. There are other cases in which one meaning is clearly felt to predominate, so as to be the 'literal' meaning appropriate to the narrative context, while a secondary meaning provides a humorous connotation: 'pressgang' (7.625), 'to show her understandings' (13.917), 'The unfair sex' (8.269), perhaps also 'nautical chest' (16.726). In Mulligan's remark on Bannon's acquaintance with Milly Bloom ('Photo girl he calls her') a bawdy meaning is camouflaged by a perfectly harmless one (1.686): 'Snapshot, eh? Brief exposure.' Short-time exposure of a film, exhibition of briefs: the meanings evoked, if taken apart, would exclude each other, but the joke works only if both are understood and felt to be present.

field, vols. I–III (A–Scz; Oxford, 1972–82). The *Supplement* takes its quotations "from the Random House edition" (vol. I, p. xviii); the references given show this to mean the edition of 1934, which is the most corrupt of all authorized editions ever published.

⁵ Anthony Burgess, *Joysprick* (London, 1973), p. 70.

5. People in *Ulysses* use the staircase (7.45ff., 10.1019ff.), as there do not appear to be any lifts in the book. There is a 'foodlift' in the Burton (8.690), but no lift or elevator to carry people is to be found in the whole of Dublin. Patrick Dignam, however, has departed to a place where they have such a machine, but that is likely to go undetected as it is spelled Sanskrit fashion: 'ālāvātār' (12.354). A dictionary would try to reduce words of this kind to normalized forms and, while leaving behind cross-references, enter and describe them under such headings as might make them accessible to those students too who do not know them beforehand. Thus 'Plamtroo' and 'Trumplee' (17.640f.) could meet under the sign of 'Plumtree', and the entry for 'bottom' would be enriched by a 'beeoteetom' (13.263). Miss Douce's disappointed 'hopk' (11.712), made up from 'cork' and 'hope', could be claimed by both its constituents. Molly Bloom, even in her silent thoughts, is a bad speller, and this is why the present *Handlist* has no entries for 'carat' and for 'viaticum' (cf. *OED s.v.* Viaticum 1.); the student relying on it will come to the conclusion that these words are not attested at all in *Ulysses*. Molly has disfigured them: 'and when the priest was going by with the bell bringing the vatican to the dying . . . still it must have been pure 18 carrot gold' (18.760f., 18.869f.; cf. 'vaunted' for 'vaulted', 'place' for 'plaice', 18.899 and 18.939). If the user of this *Handlist* wants to know whether the phrase 'off with you!' is contained somewhere in the text, he may work this out by starting simultaneously from the various entries for 'off' ('Off', 'off'), 'with', and 'you', and by trying to match the references there given. A dictionary would devote a special entry, or subentry, to just this phrase (cf. *OED s.v.* Off A.9.b.), and there would be found also its grammatical transformation (13.250): 'Edy told him no, no and to be off now with him ...'

6. A tramdriver who has a 'pugnose' (5.132) is a 'pugnosed' man (8.349; cf. 15.192, 15.4347), and a Jewish businessman said to belong to 'the bottlenosed fraternity' (12.1086) may be assumed to have a *bottle-nose* which can be found in the *OED*, though not in *Ulysses*. The *OED*, on the other hand, lists an adjective *button-nosed* with the possible meaning "(b) having a small roundish nose" (old "Supplement" *s.v.* Button *sb.* 12.), while a noun that might go with the adjective is not attested. It may at last be supplied from *Ulysses*: Mrs Dignam is said to have just such a *button-nose*. The word, it is true, does not appear in its own shape; it has to be inferred from the context (13.114f.): 'you have a beautiful face but your nose? That would suit Mrs Dignam because she had a button one.' – In the *Supplement* to the *OED*, which discards a taboo that had restricted the editors of the original volumes, four-letter words are no longer ignored, and *Ulysses* has furnished quotations. One of them concerns 'cunt' used in a transferred sense that rather ennobles it: 'the grey sunken cunt of the world' (see 4.227f.). According to this *Handlist*, this should be the word's unique occurrence in *Ulysses*. And yet it is there at least once more, in transparent disguise: 'See you in tea' (15.1895), runs a line sung by the Prison Gate Girls. The word in question is here neither spelled out, nor misspelled, nor otherwise transmuted, but still it is incorporated in the text and makes itself understood.⁶ A dictionary to *Ulysses* aspiring to be complete

⁶ An unfinished limerick of Mulligan's that has not gone into the final version of the book breaks off with 'blunt' (448.13 in the critical edition). The rhyme-word insinuated is easily guessed.

⁷ Eugène Ionesco, *Théâtre*, 1 (Paris, 1954).

and exhaustive would certainly try to find out and to register such cases in which a word makes what could be called an undercover appearance.

7. While this *Handlist* draws on the critically established reading text alone, a dictionary devoted to *Ulysses* would also have to make use of some of the information provided by the synoptic text in the critical edition (which documents the growth of the text) and by the apparatus. Readings that were canceled or superseded in the course of the textual development – in the genetic display of the synoptic text this would mean: text enclosed between square, pointed, or wavy brackets – might still be interesting for the student. Where we now read, e.g., 'What compensated in the false balance of her intelligence for these and such deficiencies ...' (17.688f.), Joyce had started by writing 'outweighed' instead of 'compensated'; 'outweighed' was deleted *currente calamo*, and it never fitted with what was to follow. Still, a dictionary should have a record of the word, which does not occur anywhere else in the final text. The student might furthermore like to learn which readings in the critically established text are editorial emendations of authorial readings judged to be mistakes. Joyce wrote, e.g., 'MXMIV' for 'MCMIV' (17.99), 'Premonstratesians' for 'Premonstratensians' (12.1681). A reader depending on this *Handlist* alone might like to make a point of the fact that 'agnathia' and 'prognathic', otherwise probably not very common in fictional literature, do indeed occur in *Ulysses* (14.963, 15.2151); a dictionary would have to tell him that Joyce, perhaps influenced by Italian orthography, misspelled them 'agnatia' and 'prognatic'. Less attention would be paid to corruptions that went into the hitherto received text; the 'phila' and the 'sidevalue' listed in Hanley's *Word Index*, e.g., are simply misprints for 'Phial' and 'side. Value' (11.691, 16.1277). The case is different for the word 'Neopoetic', which was mis-copied, probably misread, by an amanuensis from Joyce's own word 'Uropoetic' (15.4388). A meaning, maybe a modernistic meaning, can be attached to it, and for more than sixty years 'Neopoetic' has held a place in a highly influential book. In the play *La Leçon* by Eugène Ionesco⁷ the professor asks his pupil to answer in several real or imaginary languages (it is easy, for they are all exactly like French), and ever and again he hits upon *néo-espagnol*. Who is to rule out that this might go back, directly or indirectly, to a neologism created inadvertently by a scribe who could not make out what a great author had written?

H. W. G.

W. St.

The present *Handlist* was processed at the Zentrum für Datenverarbeitung of the University of Tübingen by routines of the program system TUSTEP, designed and maintained by Wilhelm Ott and his team. Wilhelm Ott, Kuno Schälkle, and Harald Fuchs helped me in every respect. With Harald Beck I discussed some of the points touched on in the preceding paragraphs. To Hans Walter Gabler I owe the privilege of having been in the team that worked on the critical edition of *Ulysses*, to which this *Handlist* is a kind of an appendix; I thank him for it.

Lustheim
October 1984

NOTE

The second impression of the Critical and Synoptic Edition of *Ulysses* issued in 1986 incorporates some modifications and corrections. In the reading text, consequently, it differs in a few places from the reading-text version from which this *Handlist* was processed. The following survey should help the user of the *Handlist* to adjust the information given to the slightly altered circumstances.

Several entries are easily remedied by simply adopting the changed forms of the new text: 'bee's' for 'bees' (15.4045), 'beurla' for 'beurla' (9.367), 'Hurhausdirektorpräsident' for 'Hurhausdirektorpräsident' (12.566), 'irreducible' for 'irreducible' (17.762), 'Ueberallgemein' for 'Überallgemein' (12.569). The emended spelling 'ferrule' for 'ferule' (1.628), however, requires the entry also to be moved up in the alphabetical sequence.

In further instances, the changed matter needs to be shifted from one entry to another existing one. To account for the new readings 'and' for 'atolls' (17.201), 'there' for 'them' (10.175), 'there' for 'then' (11.541), and 'what's' for 'what' (12.1163), their reference indications should be transferred from their former entries to their actual ones, and at the same time the frequency counts given should be adjusted; thus, the frequencies of 'and', 'there', and 'what's' increase by one or, in the case of 'there', by two, while those for 'atolls', 'them', 'then', and 'what' decrease correspondingly.

Some new readings, while detracting matter (and frequency) from existing entries, themselves go to form new entries: 'Bueñas' for 'Buenas' (15.216), 'gobbles' for 'gabbles' (15.2433). Elsewhere entries become eliminated. Thus, 'breeches' (15.2859) and 'Mecklenburg' (15.109) disappear, as the amended word forms merge with the adjacent entries for 'breeches' and 'Mecklenburgh' (raising their frequencies). Further invalid entries are those for 'broodmare' (8.345), 'dragonscaly' (2.74), and 'Saltgreen' (10.877), since these compounds have been separated in the new text. The constituents set free should go to the existing entries for 'brood', 'dragon', 'green', 'mare' and 'Salt', while 'scaly' forms a new entry of its own. The entries for 'im' and 'barr' are no longer valid as the new text redivides the Irish words in question as 'i mbarr' (15.1771); while 'mbarr' becomes an entry by itself, the Irish 'i' goes to an already existing one. Finally, the change 'nux' for 'mix' (15.1652) requires eliminating the entry 'mix' and creating a new entry 'nux'.

From the phrase that originally read 'but as in a glass darkly' (12.349), the new text has dropped the word 'but'; as there is another instance of 'but' in the same line, the reference 12.349 still remains with the entry for 'but'; only its frequency count is to be corrected. The space caused by the deletion of this 'but' in line 12.349 was adjusted by moving down the word 'that' from the end of the preceding line 12.348; the old reference 12.348 must therefore be canceled from the entry 'that'. There is, however, no need to add the new reference 12.349: it is already present, due to a second occurrence of the word in the same line.

The lines 11.843-846 have been reordered and thus redivided in the new text; some of the references to them are therefore inaccurate within the range of these four lines. The first of Don Emile Pope Hennessy's speeches in "Circe" has been canceled from the reading text (39 words); hence, all references to the lines 15.1914-1917 are obsolete, and the fre-

quencies of the following entries should be reduced by one each: 'all', 'and', 'appears', 'big', 'Bloom', 'covered', 'DON', 'down', 'EMILE', 'eyes', 'footboden', 'FRANZ', 'geese', 'grand', 'gravy', 'hauberk', 'helm', 'HENNESSY', 'his', 'in', 'indignation', 'medieval', 'noble', 'of', 'on', 'PATRIZIO', 'pig', 'POPE', 'Put', 'RUPERT', 'to', 'two', 'volant', 'wild', 'with', 'with', 'your'. The entries for 'disowns' and for 'Jude' (the German word for 'jew') should be canceled altogether.

Finally, the remarks on statistics made above (p. vii) require correction. The new reading text, running to 25.541 lines, provides 264.448 graphic units arranged under 39.801 entries.

February 1986

W. St.

ARRANGEMENT

Capitals precede lower-case letters, accented letters precede unaccented ones. Roman, italics, sloped roman and small caps are arranged in this order.

Clusters of initials or of one-letter abbreviations are listed as units. (Full stops are suppressed.)

Symbols and arabic numerals precede the alphabet. Arabic numerals connected with symbols or abbreviations are listed as units, as are composite expressions denoting weights, measures, amounts of money, or the time of the day.

Frequencies are indicated within parentheses. References are to episode (large numerals) and line numbers (small numerals).

The episodes of *Ulysses*:

- 1 Telemachus
- 2 Nestor
- 3 Proteus
- 4 Calypso
- 5 Lotus Eaters
- 6 Hades
- 7 Aeolus
- 8 Lestrygonians
- 9 Scylla and Charybdis
- 10 Wandering Rocks
- 11 Sirens
- 12 Cyclops
- 13 Nausicaa
- 14 Oxen of the Sun
- 15 Circe
- 16 Eumaeus
- 17 Ithaca
- 18 Penelope
