*This book is dedicated to Michele,
who introduced me to the glorious shores of New England,
and to Vin,
who taught me many new ways to enjoy them.*

CONTENTS

List of Illustrations	ix
List of Tables	xi
Preface	xiii
Acknowledgments	xv
1 INTRODUCTION	1
I. Subsistence Diversification	2
II. Scale of Analysis	6
2 GREENWICH COVE SITE AND NARRAGANSETT BAY: SETTING AND ARCHAEOLOGICAL FIELDWORK	7
I. Narragansett Bay: Overview	7
II. Archaeological Fieldwork	10
3 CHRONOLOGY OF OCCUPATION AT GREENWICH COVE	18
I. Stratigraphy	18
II. Radiocarbon Dates	23
III. Ceramics	25
IV. Projectile Points	32
V. Greenwich Cove Occupations	36
4 INITIAL EXPLOITATION OF SHELLFISH IN THE NARRAGANSETT BAY REGION	46
I. Introduction	46
II. Explaining the Beginning of Coastal Adaptations	48
III. The Changing Coastal Environment: Reconstructing Sea-Level Change	52
IV. Early Shellfishing at Greenwich Cove	56
5 PREHISTORIC SHELLFISH USE AT GREENWICH COVE	58
I. Molluscan Species Represented at Greenwich Cove	58

II.	The Greenwich Cove Shellfish Assemblage: Analysis and Quantification	64
III.	Changing Patterns of Shellfish Use	70
IV.	Food versus Shells: An Evaluation of Indices of Abundance	75
V.	Sampling Considerations	78
VI.	Implications of Changes in Shellfish Size	79
6	VERTEBRATE FAUNA	82
I.	Analysis and Quantification	82
II.	The Greenwich Cove Faunal Assemblage	88
III.	Patterns in the Greenwich Cove Vertebral Remains	97
IV.	Conclusions	106
7	PREHISTORIC USE OF PLANT FOODS	107
I.	Results from Greenwich Cove	107
II.	Evidence from the Narragansett Bay Region	110
III.	Plant Use Patterns in the Narragansett Bay Region	117
IV.	Summary	120
8	HISTORY OF LAND MODIFICATION	121
I.	The Palynological Record	121
II.	Native American Land Clearance	124
9	SEASONALITY	126
I.	Seasonality of Quahog Collecting	127
II.	Seasonality of White-Tailed Deer Hunting	137
III.	Seasonal Availability of Migratory Species	140
IV.	Seasonality at Greenwich Cove	142
V.	Seasonality in the Narragansett Bay Region	143
10	SUBSISTENCE PATTERNS IN THE NARRAGANSETT BAY REGION	147
I.	Expansion and Sedentism	147
II.	The Role of Demographic Pressure	149
	APPENDIX A: FEATURES AT THE GREENWICH COVE SITE	153
	APPENDIX B: INVENTORY OF SHELLFISH REMAINS FROM THE GREENWICH COVE SITE	163
	References	169
	Index	185

LIST OF ILLUSTRATIONS

- 2.1 Rhode Island and Greenwich Bay, showing the Greenwich Cove site 8–9
- 2.2 Topography of the Greenwich Cove site 11
- 2.3 Location of excavation units at Greenwich Cove 12
- 2.4 Profile of south wall of 2 × 2-m square S1/W5 14
- 2.5 Location of shell midden excavations at Greenwich Cove 15
- 3.1 The Greenwich Cove shell midden 20–21
- 3.2 Profile of east wall of 2 × 2-m square S46/W20 at Greenwich Cove 22
- 3.3 Radiocarbon dates from the Greenwich Cove site 24
- 3.4 Distribution of grit-tempered sherds in the Greenwich Cove shell midden 27
- 3.5 Distribution of shell-tempered sherds in the Greenwich Cove shell midden 28
- 3.6 Levanna points from Feature 13 at Greenwich Cove 36
- 3.7 Location of Terminal Archaic occupation at Greenwich Cove 39
- 3.8 Location of Early Woodland I occupation at Greenwich Cove 40
- 3.9 Location of Early Woodland II occupation at Greenwich Cove 41
- 3.10 Location of Middle Woodland occupation at Greenwich Cove 43
- 3.11 Location of Late Woodland occupation at Greenwich Cove 44
- 4.1 The south-to-east coast of Greenwich Cove in diagrammatic cross-section 54
- 5.1 Quahog (*Mercenaria mercenaria*) 59
- 5.2 Soft-shelled clam (*Mya arenaria*) 59
- 5.3 Eastern oyster (*Crassostrea virginica*) 60
- 5.4 Bay scallop (*Aequipecten irradians*) 61
- 5.5 Boat shell (*Crepidula fornicata*) 62
- 5.6 Ribbed mussel (*Modiolus demissus*) 63
- 5.7 Minimum numbers of individuals, by occupation, for the most abundant shellfish species in the Greenwich Cove column samples 71
- 5.8 Shell weights, by occupation, for the most abundant shellfish species in the Greenwich Cove column samples 76
- 5.9 Available meat, by occupation, for the most abundant shellfish species in the Greenwich Cove column samples 77
- 5.10 Mean height for oyster shells from the Greenwich Cove column samples 79
- 5.11 Mean chondrophore length for soft-shelled clams from the Greenwich Cove column samples 80

- 5.12 Mean hinge–beak height for quahogs from the Greenwich Cove column samples 81
- 6.1 Relative importance of white-tailed deer as measured by all abundance indices 97
- 6.2 Relative importance of vertebrate classes represented in the Greenwich Cove shell midden as measured by MNI 98
- 6.3 Relative importance of vertebrate classes represented in the Greenwich Cove shell midden as measured by NISP 99
- 6.4 Relative importance of vertebrate classes represented in the Greenwich Cove shell midden as measured by available meat 100
- 6.5 Number of species and identified elements, by occupation: pooled simulation results and actual numbers from the Greenwich Cove midden 102
- 6.6 Results of unpooled simulation of Greenwich Cove faunal assemblage 105
- 7.1 Location of sites in the Narragansett Bay region from which macrobotanical remains have been examined 109
- 8.1 Pollen diagrams for cores taken from the Greenwich Cove kettle and Goddard Lake 122
- 9.1 Idealized cross-section showing shell growth features in the quahog (*Mercenaria mercenaria*) 128
- 9.2 Daily line counts in modern quahog shells since the winter break 133
- 9.3 Longitudinal section of a white-tailed deer tooth from the Greenwich Cove site 138
- 9.4 Seasonal use of resources at the Greenwich Cove site 141
- 10.1 Percentages of lithic raw materials at the Greenwich Cove site that could not have been obtained locally 150
- A.1 Feature 2 154
- A.2 Feature 13 155
- A.3 Features 14, 16, and 17 and associated post molds 156
- A.4 Profile of Feature 14 157
- A.5 Plan view and profile of Feature 15 158
- A.6 Features 36 and 41 and large ash deposit 159
- A.7 Feature 40 160
