About The Author

CHAPTER 1- ENTER THE WORLD OF FARM ANIMALS

Around the world, there are many different animals that are raised by people. We call these animals "farm animals". In this book, we will learn about the common animals that live on farms.

We will also learn about how some animals help people by protecting other animals. Quiz questions about each animal will help you think about what you have learned. All answers are at the end of the book.

CHAPTER 2- HORSES

The horse is an animal that is meant to work on a farm. They can pull heavy loads, even more than their own weight.

Parts Of The Body: The horse's mouth is called a muzzle. The top of the head has pointed ears that can hear very well. A horse has hooves on its feet.

Noises: The horse likes to make sounds like neigh and whinny. They will also make huff noises.

Where They Live: Horses are given their own part of the land on a farm. This land is home to a few horses at a time.
